All products are available in green and blue.

Two bag dispensers

you can even try out our sponsoring dispensers to take advantage of the built-in advertising opportunity

2,000 bags

more than enough to get you through your two-month trial

ABOUT PRACTICA:

Practica is a Canadian-owned company that's committed to keeping the environment clean with our innovative dog waste solutions. Ideal for municipalities, city parks, condos, hotels, and veterinary clinics, Practica bag dispensers and disposal units minimize the spread of bacteria, disease, and pollutants from dog waste. Practica makes it easy for pet owners to pick up after their dogs and helps create a healthier community for everyone to enjoy.

For the last 5 years we have had about 25 Practica dispensers throughout our trail and park system. The Practica system is well used (over 100,000 bags each year), is durable and has drastically reduced the problem of dog waste being left on the ground in public spaces. The pricing is fair and delivery is fast. I highly recommend the Practica system.

City of Fredericton, NB
Community Services Department, Parks & Trees Division

Our department has utilized the doggie pick up bags from Practica Ltd. for the past several years. We go through approximately 40 packages of 2500 bags a year, which is a testament to how popular these bags are, and how much dog feces is being picked up because of their availability, as opposed to being left to litter our city parks and trails. I find Practica great to deal with, orders are always processed in a timely manner, and their prices are competitive.

Poop happens!™

THE BENEFITS:

Communities all across Canada are enjoying healthier, safer parks thanks to Practica. In fact, the Kilcona Dog Park Club conducted a one-year pilot study to try it out for themselves. The results were clear: the bag dispensers work! They had fewer complaints, a cleaner park, and picked up less waste in their bi-annual clean-ups.

In a survey of their park users, they found:

85%

reported they pick up after their dogs all the time

71%

noticed fellow park users were picking up after their dogs more often

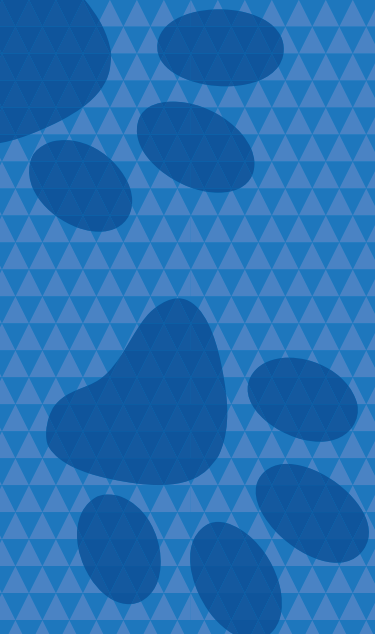

85%

brought their own bags and relied on the dispensers only as a back-up (reducing costs for the dog park)

57%

found that humorous educational signs helped encourage people to pick up after their dogs
